

996-HCH-RG Not since 1840 has a magnificent Gasolier like this one been made. No expense was spared in it's re-creation. To describe it is not easy since it's so loaded and dripping with design and figurals that it challenges description. But we'll try: Faces on the arms & shade fitters & gas keys & chain holders. Then cupids on the chains themselves & full body grecian women figures between each arm. The center has columns and vases with flowers. Flowers jump from the body of the light in every conceivable place, a few birds are there in addition to the victorian scrolls and sweeps that are packed onto the light in great abundance. Talk about great Neo-Rococo ! Whew !

767-PRC-LG Here's our favorite model showing you her new dress, and, just how large our latest outdoor light addition, really is. This gracious monster (the light) stretches over 26" in length, protrudes 15" and has a 5" x 8" backplate. It mounts with four lag bolts, which have their tops drilled and tapped for a decorative, bolt-head hiding, solid brass cap. A nice touch. The hand blown opal shade is one piece, not bits of bent glass. Rated for up to 200 watts. *A hanging version, will be on the next supplement*

ZF-125 Nice lost wax cast, widespread faucet set in the shape of a swan with spread wings. Handles are shaped bird's neck & head. Washer type faucet so easier to maintain. Scallop shell motif drain pull. Handles are 3 5/8" long with a Ø 2 5/8" base. Swan faucet: 7 1/4" wide; 5 5/8" tall; Projects 1 1/4" from the center of the faucet mounting hole. Supplied with flexible connecting pipes and a brass pop-up drain set. Everything you need for a sink.

ZM-16525 Another large item for this page. What a beauty. This grate is perfect for those large return air applications. Fits a 16 1/2" by 25" boot and has an overall size of 18" x 26 1/2". Weighs about 40 lbs

We attribute this wonderful light to Corneliuss & Son, made about 1840, when chains on gasoliers were in vogue. Knowing about early gasoliers, this piece had to have been made for a very substantial dwelling or perhaps a CEO's office. It's one in a million ! Whopping 52" spread (w/-shades) Main Body: 41" tall and comes with 39" brass pipe equals an 80" drop. Shortest: 47". 2 5/8" fitters. This jewel weighs in at 120 lbs. *Rated for 100 watts per shade. Our opinion...best 6 light in America.*

996-HCH-RG

132-BDG-2 Art Nouveau motif, Circa 1910 reproduction bridge lamp. Note the bridge arm with blue bells motif and wonderful "Nouveau" feeling. All the lovely castings here are lost wax. We are showing this light with our leaded shade, **0114G**, which appears on page 68 of the winter catalog.

However, the lamp is sold without a shade but comes with the 2 1/4" clip on fitter so you can choose any 2 1/4" shades from those catalog pages 68 & 69 in the main catalog or use a nice antique shade. Overall height: 62". 13" overall arm. Base: 14" Shipped disassembled for safety with "good" instructions.

768-PRC-FC Exceptional Arts & Crafts, cast solid brass lantern porch light. Hexagonal lantern with butterscotch art glass windows. Mounts with two lag screws that come with decorative tops to hide the bolt heads. An intricate porch light, containing several brass castings. It is a more like a work of art than a light. Impressive size: 19 1/2" in overall height; projects: 12"; backplate is 4 3/8" wide by 12". Rated 100 watts.

769-PRC-EP Great hanging pendant using 768 hexagonal lantern. OA ht: 32" Lantern: 6 3/8" x 14 1/2". Really outstanding when used together with a 768 on a porch. What a look ! *Rated: 100 watts*

768 & 769 were originally made by the Royal Fixture Co., Milwaukee. Pictured in their catalog C. 1920
