

ZB Series Lost Wax Brass continues with:

ZB-10SP Windsor Entrance Door Plate...use with our lock L-9SP/SL or DL depending on which function you choose for the other side of the door. Two thumb latches would use the DL version while a thumb latch and a door knob would use the SL version. See catalog pg 26 for the lock. The plate is 2 1/2"wide by 15 3/4" long. **ZB-10TL** for inside the door having a turn latch for the dead bolt of L-9SP. Same size as

the SP version. **ZB-10HO** for just a lovely pull with no mechanical function. A smaller plate that measures: 2 3/8" by 12". **ZB-10TH** is the same size plate as the HO version but this <u>does</u> have a thumb latch which could either be left as a dummy or use with our thumb latch lock **ZLW-198L** on pg 40 of the catalog. Anything you chose...just lovely. All are darkened w/- Hi/lo finish to match all of the Windsor pattern.

ZLW-210 Early, lovely rococo design doorbell push. Fabricated bakelite interior and push button. Mounts by screwing backplate to the wall and then screwing the decorat-

ed cover onto the backplate. It is really two parts ..but.. appears as one. No screws are seen. Lost

Wax cast brass. Antique Hi/lo finish & lacquered. Dia: 2 3/4"

ZLW-111BL

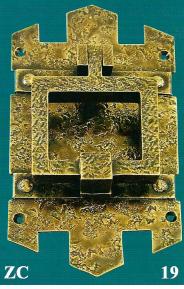

Lost Wax cast solid brass, aesthetic doorbell which is just plain Lovely. Real

bakelite push button too. 5 5/8" tall by 2 3/8" wide.

ZLW-117

While it does not "exactly" match the bell push, this very nice aesthetic keyhole is just a great similar pattern. 2 3/4" tall by 1 1/2" wide.

Both are Antiqued w/hi/lo finish.

Fantastic very large, Lost Wax that ha cast solid consid brass, Arts laughi & Crafts Projects Picket style door knocker. Consider the size 10 1/4" tall by 5 5/8 weighing in at 4 1/2 I More like a batterin

Consider the size at 10 1/4" tall by 5 5/8" wide weighing in at 4 1/2 pounds. More like a battering ram than a door knocker...but..for great impressions--this is it! Light weight doors beware.

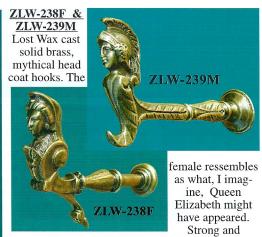

Darkened and lacquered.

Simply Fantastic!

ZLW-228

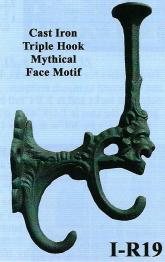

Lost Wax cast solid brass, Arts and Crafts or aesthetic pushplate. Very neat with a dragonfly, cattails and a lilly pond. Wonderful clarity and

aesthetic theme 10"tall by 3"wide. antiqued w/-hi/lo finish

Determined. 4 3/4" overall with a 1" base. The male appears to be a roman or greek soldier. 5" overall with a 1 1/4"base. Both are Darkened w/-Hi/lo finish. Both have base pins to keep them from turning after installed. Very attractive and eye catching. Detail is superb as is necessary with faces.

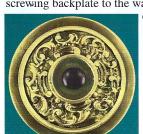

I-R19 A much requested sand cast IRON hook that has been re-cast, from the original, for your consideration. Nice triple hook with a mythical laughing face as a focal point. Overall ht is 7"; Projects: 4" & the base meas: 2"wide by 2 7/8"tall

ZF-150 Lost Wax cast Sea Dragon Faucet set. Nice thing about this set, (besides being just plain gorgeous) is that it was made the old fashion way..i.e. it takes simple 10 cent washers to stop leaks. For the spout you have this impressive sea dragon creature and for handles we have different full body sea creatures. Even the pop up knob is unique being another sea beast form. Besides this, the base for each

handle has no less than SIX sea creatures depicted: a crab; a seahorse; a turtle; a sea dragon; a flying fish; a scallop shell. Really quite unusual. Set is complete with all below sink plumbing & hoses. Meas: because it uses flexible hoses, the spread can be infinite. The height of each water handle is 4" overall and the faucet spout also has a height of 4 1/2" which a reach from front to back of 7"

Hi/lo fini.
