

In the early 1900's, when elaborate decoration was giving way to inexpensive lightweight design, a few companies continued to design better quality lighting.

They continued to create the high end which, in this case, are cast & pierced bodies w/-elaborate armback decorations. Represented here are what was the "high end" of Late Victorian electric lighting.

*All
Lost Wax Cast*

*All
Solid Brass*

Quality "pierced"
cast lighting

We offer four chandeliers with dual purposes. 456 and 458 can be mounted on low ceilings while 457 and 459 give a great range of heights starting at 41.5". This allows a house with mixed ceiling heights to match fixtures. Lost Wax Cast, solid brass, these fixtures are unique and simply gorgeous.

456-CCL-FC
Height only 13 1/2", W: 28"
457-OFE-CH W: 28",
Ht: 41.5" (shortest 25"),
458-OCC-FC
Height only 13 1/2", W: 28"
459-OFE-CH W: 28",
Ht: 41.5" (shortest 25"),

*All fixtures are priced before
shades are added.
All fixtures here take
2 1/4" fitter shades*

514-DFE-ES

(514 & 515) attributed to the Reading Hardware Co, of Reading, PA. Circa 1905. Lost wax cast, the center pierced cone decoration is unique and desirable in lighting circles while the "Swan Neck" arms are topped off with one of the most beautiful decorative armbacks we have ever seen.

514-DFE-ES Ht: 16.5", Wid: 25", Projection: 17"
515-PFE-CH Ht: 42", Spd: 33", Shortest: 21"
Both Lights use 2.25" fitter shades

80-CCL-TL

80-CCL-TL Low ceiling Light

In comparison with 456 and 458 which are very nice fancy low ceiling lights, we illustrate our simple 80-CCL-TL. "Gas Fixture & Brass Co.", of Cleveland, Ohio catalogued this ceiling light in their catalog of 1910. Measured with shades: Height only 11"; Spread: 26"; Canopy: 5" dia.

This light mounts to the electrical box, in the ceiling, with a piece of all thread which is threaded into the crossbar (supplied) with the decorative finial.

For older homes that do not have wall light switches, cord pull switches can be added to any light we sell
