- Oil Rubbed Bronze Finish {Brass} with Frosted Shade
- Polished White Metal {Zinc} with Frosted Shade
- Matte White Metal {Zinc} with Frosted Shade
- Oil Rubbed Bronze Finish {Zinc} with Frosted Shade

1) Socket Types:

E-26 or GU-10 (see below for bulb types)

2) Bulb Types:

Incandescent or LED (both E-26 & GU-10 sockets)

3) Voltage: 120v but 220v is available

4) Overall size: 11" high by 6 3/4" wide and projects from the wall 5 1/4"

Bulb Choices:

E-26 (left) while the most familiar, it does not guarantee that LED bulbs will be always used. While we prefer the "corn" bulb shown (for more efficient light distribution), any E-26 bulb (incandescent too) can be used. GU-10 (right) Chapter 24 compliant energy saving option. These bulbs ranges from 7.5 to 9 watts and each bulb has a 100 watt incandescent equivalency. The "look" might change a little from mnf to mnf...but they all do a great job & lock-in the LED decision.

Most Familiar E-26 medium base socket- for both LED, and 100 watt incandescent use. Many options here.

GU-10 Socket
